25X1

1. The monthly production on the 6SA7 tube has been 2,000 tubes, but since 21 March 1953 production of this type has been temporarily suspended.
2. The EF 80/85 tube will be produced in greater quantities, beginning with 30 March 1953. Whereas only about 2,000 units were previously produced in a month, and most of these were used for research purposes, the figure will now go up to 60,000. It has not been stated how long a time will be set for the production of the 60,000 tubes.
